## **Legal Education Developes the Society**

Law is the activity of subjecting human behaviour to governance of rules. It helps in regulating the use of power. In a free society each person has a recognised private or protected realm which government authority cannot encroach upon. The purpose of law is to protect this private realm and ensure equality in the society which is essential for sustainable development of the nation. Legal education helps us achieve knowledge and vision to understand the need of a society and develop empathy for others. I am happy to know and congratulate you for opting to study Law at SR College of Law which is one of the leading law colleges of NCR. I am sure you shall utilise this opportunity to bring change in your life and Society. God bless!!
